📚 YANMAR

Tough terrain needs a tougher tractor.

When the going gets rough, the new SA425 is still a smooth ride.

With the highest ground clearance and added weight of cast iron rear axle housings, the SA425 provides stability under even the toughest conditions, with the comfort of an operator's platform that was designed with you in mind. Every instrument and control is at your fingertips, so you can enjoy the power and precision of Yanmar's famously reliable three-cylinder, liquid-cooled diesel engine and our unique combination of horsepower and fuel efficiency.

INNOVATIVE DESIGN AND TECHNOLOGY

COVER THE TOUGHER TERRITORY. The 425 is outfitted with a larger, more aggressive tire package. This makes

for a tractor with increased ground clearance and greater operational stability over challenging terrain. It means you can get on board and operate in the toughest of territory with complete comfort and confidence. With this increased operating confidence, you'll be able to get even more out of what your land has to offer.

SIMPLY PUT, LIFT MORE.

The pure power of the 425 means it has a loader capacity of 1,200 lbs. at the pivot pin. That's power usually associated with much larger tractors. But that's Yanmar's strength- fuel-efficient diesel engines that help you do more.

PRECISE REAR IMPLEMENT CONTROL.

Making sure your rear implements operate in a position that's always repeatable means your tasks get done quickly and more accurately. And that's what YANMAR's unique True Position Control delivers. An easy to-reach control lever adjusts the rear implements operating height and makes sure it's always right where you need it.

425 MULTI-PURPOSE COMPACT TRACTOR

FEATURES

CAST IRON TRANSMISSION, FRONT AXLE, AND DUAL HYDRAULIC PUMP

TWO SIDE-BY-SIDE HYDROSTATIC TRANSMISSION PEDALS

FULL-FRAME CHASSIS

ELECTRO HYDRO INDEPENDENT PTO WITH ONE-TOUCH ON/OFF

FRONT-END LOADER CAPACITY + QUICK ATTACH

SMOOTH, HYDRAULIC POWER STEERING

12V OUTLET STANDARD

YANMAR 425 Tractor Specifications
